*Journal of Non-Newtonian Fluid Mechanics*, 51 (1994) 343
Elsevier Science B.V.

## Subject Index of Vol. 51

A1, 111
axisymmetric modes, 227

bifurcation parameter, 227
boundary integral method, 161

Couette flow, 227
calculus of variations, 239
composite overlapping grids, 309
creeping flows, 277

Discontinuous Galerkin method, 141
damping coefficient, 179
dilute emulsions, 161
discontinuity capturing technique, 231
drainage, 21
draining film, 125

elastic free energy, 239
elastic instability, 195
elastoplastic fluids, 61
equation of motion, 97
extrudate swell, 1

finite differences, 309
finite element method, 249
finite elements, 1
finite volume method, 249
first normal stress coefficient, 179
fluid jet, 97

Gieskus model, 309

Herschel–Bulkley fluid, 61

inverse tangent function, 179

K-BKZ fluid, 195

linear viscoelastic fluid, 239
liquid drop, 161
liquid films, 21
local vorticity wave speed, 249
lubrication theory, 61

Maxwell-B fluid, 277
monotonicity enforcement, 141

nonlinear stability analysis, 125
numerical experiments, 141
numerical simulation, 249

Oldroyd-B fluid, 227, 309
Oldroyd-B fluids, 231
onset criterion, 79
oscillating vertical surface, 21

Phan-Thien–Tanner model, 141
paper-coating flow, 309
planar contraction, 231
plasticine, 61
polymer solutions, 79, 195
porous medium, 79

rod climbing, 111

shear and elongational viscosity, 179
shear thinning, 125
simple shear flow, 161
spectral element method, 277
squeeze-film flow, 61
steady solutions, 231
stick–slip problem, 141
streamline upwind, 1
surface tension driven, 97
surface viscosity, 161
surface wave instability, 125
surfactant solutions, 79

Taylor–Couette instability, 195
time stepping, 231
time-dependent viscoelastic flow, 249

upper convected Maxwell model, 309

viscoelastic film, 125
viscoelastic fluid, 277
viscoelastic flow, 309
viscoelastic fluids, 1
viscoelastic instability, 227
viscoelastic jets, 97
viscoelastic liquids, 21
viscometric flow, 239
viscous effects, 79

Wagner's equation, 179
Weissenberg effect, 111
White–Metzner fluid, 1
White–Metzner model, 111
